

Stamina fungicide seed treatment technology sheet

The benefits¹ of AgCelence® for preventative protection against rhizoctonia in corn.

- Effective protection against seed rot caused by *Rhizoctonia solani*
- More consistent and uniform emergence, for maximum yield potential
- Increased seedling vigour both above and below ground, even under cold conditions²
- Enhanced ability to manage exposure to minor environmental stress²

Formulation

Water-based suspension

Storage

Store in cool, dry, well-ventilated area away from feed or foodstuffs. Protect from freezing.

Crops

Corn (field, pop, seed, sweet)

Staging

Applied on-seed by select seed companies

Disease controlled

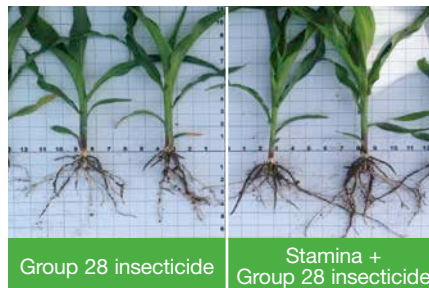

Seed rot caused by seed- and soil-borne *Rhizoctonia solani*

Seed treatment compatibility

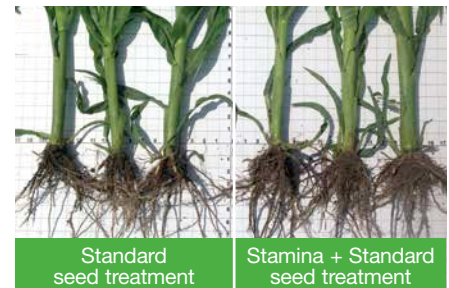

Stamina™ is compatible with Group 28 insecticides. For details on seed treatment compatibility, contact your BASF Sales Representative or call **AgSolutions®** Customer Care at 1-877-371-BASF (2273).
