

Features ear flex, so populations are best kept to lower seeding rates. Responds to high-yielding environments but is also adapted to medium to lower yielding fields. Use as a dual-purpose hybrid. Flexible ear style allows population to match yield goal. Positioning on higher fertility soils will help maximize yield potential. True flex ear type – do not need to push the population for optimal yields. Handles challenging situations well – plant health and flex ear (strong candidate for sandier soils). Adapts very well to sand and lighter soils. Big plant that handles stressed environments very well.

PRODUCT FEATURES

- Features superior high-end yield potential with large ear size and girth
- Very good ear flex allows for adaptation to tougher acres and coarse soil types
- Agronomically sound with solid foliar disease package
- A hybrid with phenomenal upper end yield potential
- Flex nature and strong plant health allow positioning across a wide range of acres

All orders and sales are subject to the PRIDE Seeds Terms and Conditions of Sale, which include but are not limited to the Limitation of Warranty & Remedy and Agronomic Zone and Planting Year. All Terms and Conditions of Sale are subject to change from time to time without prior notice. PRIDE® & Design, P® & Design, Advantage Acre®, and Pride Advantage Acre® & Design are registered trademarks of AgReliant Genetics Inc. Characteristics are assigned by PRIDE® based on comparisons with other PRIDE® products (not competitive products) through in-house field testing. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with products with Roundup Ready 2 Xtend® soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED AND APPROVED FOR SUCH USES. Contact the Pest Management Regulatory Agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Bayer retailer, refer to the Bayer Technology Use Guide, or call the technical support line at 1-888-283-6847 for recommended Roundup Ready® Xtend Crop System weed control programs.
